SUCCESS STORY

INDUSTRY:
Information Services

OFFERING:
Data Ingestion and Analytics on Azure

CUSTOMER OVERVIEW

A leading provider of business information for risk management, sales & marketing, supply management decisions worldwide. More than 100,000 companies rely on this firm to provide the insight they need to help build profitable, quality business relationships with their customers, suppliers and business partners. It offers various products and services solving for credit, risk, marketing, sales, analytics and more.

CUSTOMER SITUATION

Customer wanted to setup an application for data ingestion and analytics. This application is designed to serve a dynamic utilization of data. Running an un-predictable application on-premise required high CapEx leaving unutilized resources.

SOLUTION

- Azure VM Scale sets & Azure Automation allows scale up/scale down
- Azure Backup and Azure Site Recovery allows backup and DR without any third party tool
- They are now running a dynamic infrastructure that can scale from 1 server to 20 servers using Scale Sets. This can be stretched to a larger value basis future requirement
- They have not done any CapEx investment which otherwise would have been for at least a Hypervisor that would have been used to host 1-20 VM at any time
- The agility experienced by the customer on Azure platform has now prompted the customer to look forward towards a Journey to Cloud.
- Client has started the evaluation for migrating the complete on-premise workload to Azure cloud

IMPACT

- No CapEx investment and zero wastage of resources
- Cost benefit of running Windows Server and Windows SQL workload on Azure
- Having a Disaster Region pair within India
- Azure Backup and Azure Site Recovery as a managed service eliminated the need of deploying any third party solution for Backup & DR
