SUCCESS STORY

INDUSTRY:

Banking, Financial Services
and Insurance (BFSI)

OFFERING:

Insurance Application
on Azure

CUSTOMER OVERVIEW

A Health insurance company offering differentiated health insurance solutions including health and wellness programs that support customers in making lifestyle changes and managing chronic medical conditions. The company is headquartered out of Mumbai, India with 19 branch offices covering major metros and category – A, cities/towns. Currently, it has a network of around 14000 agents, 250+ major brokers and 8,000 points of sale across the country. It also has exclusive tie-ups with 13 leading Banks NBFCs and for distributing health insurance solutions.

CUSTOMER SITUATION

- Insurance Application required a scalable and highly available infra
- Cigna wanted to focus on Application Development and do away with the overhead of managing servers

SOLUTION

- Azure PaaS SQL DB and App Service provide a scalable and agile environment for hosting the application
- Application developers focus on the apps/DB. This allows faster time to release new application features and changes
- Azure platform has been used to run critical application without the need to manage any server (no IaaS)
- Azure monitoring stack allows detailed application performance insights without the need to deploy any third party tools

IMPACT

- This is inline with the Azure Cloud adoption strategy of Customer
- Scalability & Availability along with high-grade security lead to choice of Azure Cloud
- Services like Azure WAF are a completely managed security solution
